

THE "Black Steel"®

ADVANTAGE

PRECISION
AT AN
AFFORDABLE
PRICE!

As if affordability wasn't enough, APS also offers a high quality disc. The "Black Steel"® discs are CNC-machined from a one-piece forging, allowing a stronger disc and a reduced risk of cracking. The APS heat treatment process provides additional strength to the steel, and provides the surface with a high resistance to rust and corrosion. The APS "Black Steel"® brake disc is the first choice among many commercial operators, making our brake discs the "proven original."

CJ AEROSPACE ARE AUTHORISED DISTRIBUTORS OF APS BRAKE DISCS, LININGS & RIVETS
